Trading made simple and fun by Vik

I have been following Vikinsa Capital for past 1.5 years and was amazed at how his analysis almost always came true over time. I finally took the plunge and enrolled for his one to one classes. Over 9 intense days Vik took me through the magic of FCP and made a novice who did not know ABC of Technicals learn deeply about how to analyze the markets. Vik was very thorough and patient in teaching me the concepts and is always very responsive to any queries that I have even after completing the course. His army of FCP traders are trading wonderfully and I would highly recommend this course to everyone.

Learn Trading by Hand!

I would like to begin this review with one of my favorite quotes: "insanity is doing the same thing and expecting different results". I too was in the cycle of doing the same thing and getting nowhere. This course will show you the right path and ways you can be a successful analyst and trader. Vikinsa taught me the right way to analyze markets which retail traders fail at.

Vikinsa is a great teacher and will teach you in a traditional classroom atmosphere by hand! The course and content are what every trader needs to be an FCP Elite. You will only realize the power of FCP once you learn to play by its rules.

It's been about 8 Months since I completed the Course and real learning will begin when you apply the knowledge to your specific markets.

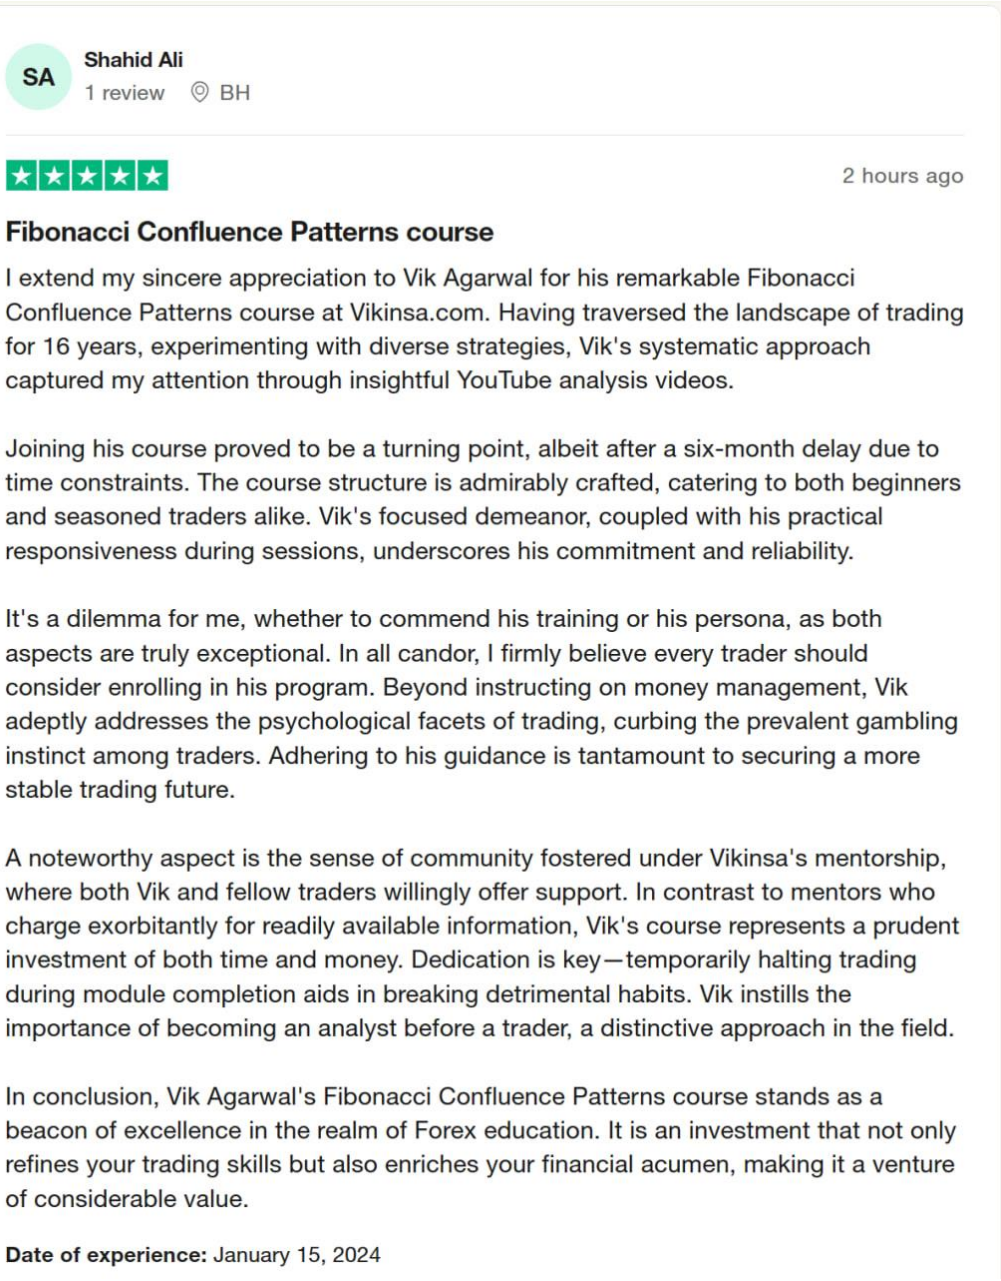

Join the course to understand the mechanics of trading. Knowledge is forever. Sometimes, you have to go back to the old school ways of learning. It's that easy.

Date of experience: 01 January 2023

Fibonacci Confluence Patterns course

I extend my sincere appreciation to Vik Agarwal for his remarkable Fibonacci Confluence Patterns course at Vikinsa.com. Having traversed the landscape of trading for 16 years, experimenting with diverse strategies, Vik's systematic approach captured my attention through insightful YouTube analysis videos.

Joining his course proved to be a turning point, albeit after a six-month delay due to time constraints. The course structure is admirably crafted, catering to both beginners and seasoned traders alike. Vik's focused demeanor, coupled with his practical responsiveness during sessions, underscores his commitment and reliability.

It's a dilemma for me, whether to commend his training or his persona, as both aspects are truly exceptional. In all candor, I firmly believe every trader should consider enrolling in his program. Beyond instructing on money management, Vik adeptly addresses the psychological facets of trading, curbing the prevalent gambling instinct among traders. Adhering to his guidance is tantamount to securing a more stable trading future.

A noteworthy aspect is the sense of community fostered under Vikinsa's mentorship, where both Vik and fellow traders willingly offer support. In contrast to mentors who charge exorbitantly for readily available information, Vik's course represents a prudent investment of both time and money. Dedication is key—temporarily halting trading during module completion aids in breaking detrimental habits. Vik instills the importance of becoming an analyst before a trader, a distinctive approach in the field.

In conclusion, Vik Agarwal's Fibonacci Confluence Patterns course stands as a beacon of excellence in the realm of Forex education. It is an investment that not only refines your trading skills but also enriches your financial acumen, making it a venture of considerable value.

About Your Instructor

Vik Aggarwal

Founder @ Vikinsa Capital Management | ex-Morgan Stanley | ex-Credit Suisse | Financial Markets Analyst, Trader, Fund Manager & Mentor

With 18 years of vast experience in the Finance Industry working for multinational top trier investment banks their hedge funds clients, Vik found a natural affinity to financial markets.

He started learning financial trading himself with his financial background knowledge in 2011 alongside his regular job. After quitting his award-winning career (GE Commercial Finance , NBC-USA, e-Businessware Inc., Credit Suisse and Morgan Stanley) in the investment bank 2014, he started manual trading and development of sophisticated trading algorithms for himself.

Vik initially traded London AIM stock market for some time where he traded few stocks such as QPP, QFI, AFS, SEE and TOM successfully but soon realised that most of the AIM market was extremely volatile and usually had very low liquidity. He then started trading FTSE 100 heavyweights (Barclays and Lloyds) shares to avoid manipulations and volatility however they did not have as many opportunities as Forex, commodities, indices and derivatives markets. As technical and market analysis knowledge that he gained could be applied to any markets he found himself more at home with the forex, indices, commodities, US stocks and forex options.

Over time he has built a great track record in analysing commodities, metals, indices, forex and cryptos market with great accuracy and publishes his work via his various social channels. His gold and dollar analysis are some of the most accurate and well documented ones.
He has trained over 30 select few committed budding and experienced traders from all over the globe including seasoned Chicago pit options traders with 35 years' experience, multi million dollar portfolio owners, business tycoons and some of the best top managing directors and portfolio managers.

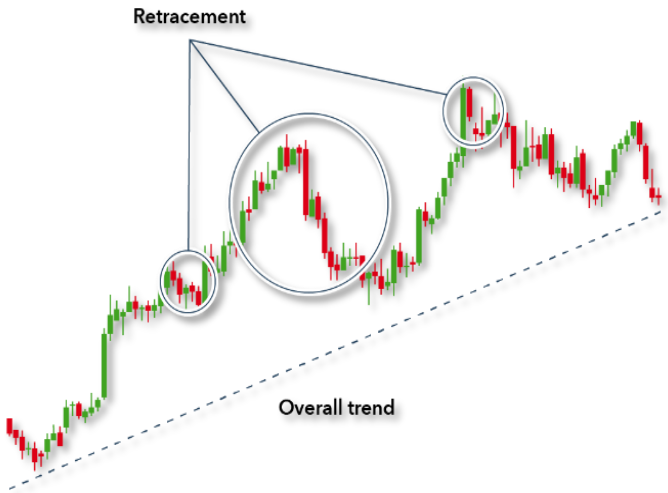

He has founded a start up firm Vikinsa Capital Management in London with a goal of turning it into one of the best market analysis advisory, trading, hedge fund and education firms.

He is passionate about education as he believes that market analysis is a skill which can be taught and used in the markets effectively.

Vikinsa Capital Management

About Your Instructor

My trading techniques involve Price Action Study, Momentum Observation, Fibonacci Ratios, Fibonacci Confluence Patterns (FCP), Trend Assessment etc. After a long and excruciating initial trading journey I found my niche in trading. I developed my proprietary methodology where I use simple price action with of confluence with Fibonacci, Bollinger bands and Moving averages.

My experience in binary options gives me an extra edge in the markets to strive for accuracy which most traders miss upon hence jeopardising their Risk/Reward ratio.

My trading philosophy is not to go for home-run big moves in the market but to find accurate opportunities along the way and take multiple profits with high predictability, consistency and accuracy.

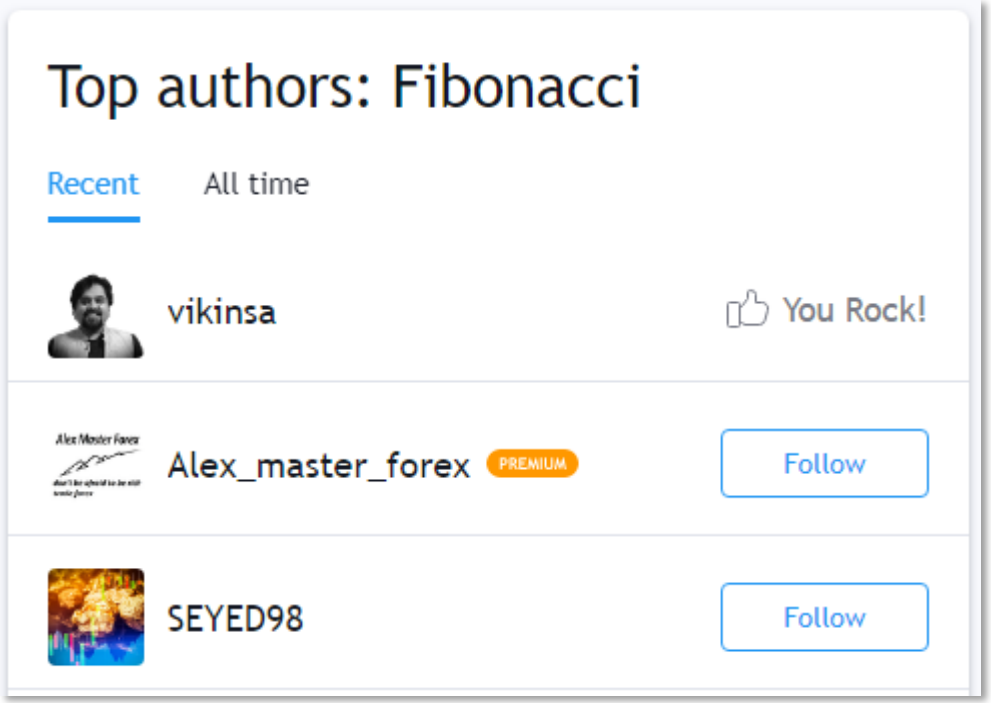

I regularly publish my trading ideas, analysis on LinkedIn ,TradingView, Twitter, YouTube, ForexFactory and on Telegram. I love helping out fellow traders and give back to the trading community.

My professional experience, profile, awards and recommendations on the work ethic are available on my LinkedIn Profile.

FCP Training is the Best Training in the Trading world

I really regret I did not find Vikinsa when I initially started trading. Anyway, it's never too late, as it is said we need to go deep and then we find right path and my absolute right path is Vikinsa.
No teacher can teach you trading as Vik does.
His technique and method is just so unique.
Once you are train under him there is no look back
His teaching is just not limited to trading, FCP students are thought to believe have a positive mindset and then trade
Big thankyou to Vikinsa Sir you made my trading journey interesting and now there is not a single day when I do not look at the charts.

No stress, no chasing the markets. Just being pure in control.

So you want to be a trader or you think you are a trader. Either way if you are really serious about becoming a better and what is most important a profitable trader, this is the course you need to follow. I got the learn about Vikinsa (Vik) from his analysis on Trading View. What got my attention was the depth of his analysis and the outcome of his analysis: which time after time proved to be correct. I was wondering what it was, that he was doing different than other analysts. Eventually I followed his weekly analysis video's for almost three months and later joined his telegram channel.

Best points of FCP Methodology

- **Mathematical approach:** The whole methodology is based on simple Fibonacci numbers and is maths driven which gives the best accuracy. This helps trading psychology too.
- **Structured:** It follow a structured and layered approach in analysis and execution
- **Rules based:** To eliminate subjectivity and emotions, nearly 95% of the methodology is strictly rules based.
- **Applicable to all markets:** It works in all markets if enough historical data is available.
- **Supports all trading styles:** As this is rule and structure based methodology, it works on all time frames. It can be used for scalping, day trading, position trading.
- **Indicators Free:** It does not require any indicator. However, if needed, indicators can be used with this.

Fibonacci Confluence Patterns via One-To-One Training

I am Dan Dumitrescu, an Australian living in Barcelona, have a doctorate in Computer Sciences, and had a successful corporate life. I stopped working and 3 years ago I decided to make trading my hobby. I am fortunate enough to have sufficient funds to get proper training and in the last 3 years, I have attended paid trade training with some of the better names in the industry. All of them have trained me as a retail trader and after practicing what I had learned, (and coming from an exact science background - mathematics), I found their training very subjective. Then I came across the methodology designed and taught by Vikas (via his company, Vikinsa Capital Management). In my opinion, Vik provides the best trading training in the industry today, for a number of reasons that I highlight here. 1. His entire training is based on how the market movers (the big global banks, global funds) operate. 2. The methodology is extremely precise in terms of Entry, Stop Loss, and Profit Target. 3. It has a top-down approach analyzing the market at the monthly, weekly daily timeframe and executing at H4 time frame which has 3 major impacts: increase accuracy of the trades, reducing significantly reduce the stress present at lower timeframes where I used to operate before (M5, M15, even H1) and reduces the time spent in front of the screen. 4. This is a one on one live training with 8 sessions of 1-1.30 h each and 4 sessions over 4 weeks at the end of Q&A. After each class there is an assignment and Vik provides the feedback before the next class. So there is plenty of time to practice what one's has learned. 5. Vik has an amazing system via Discord, to be in continuous contact with his students and continue their development. 6. Last but not least, Vik is very generous with his time and knowledge sharing (not only for his students but also for aspiring traders that have not signed for his training), via Discord, Linkedin, YouTube, and Telegram.

FCP (Fibonacci Confluence Patterns) One-To-One Training

I must say if you are new to trading or just started. This is a MUST course for anyone or everyone to attend, to get the basics rights and develop the right skillset on FCP methodology. FCP is very powerful and will give you a very good edge while taking a trade. Vik is a very humble person and been very generous with his time and makes sure everyone gets the concept right and all the questions get answered!

Vik's support in building a strong community of traders and helping everyone on a regular basis to share ideas and knowledge via various channels is worth admiring.

Hey, if you don't believe me! Just watch his videos on Youtube and you will be surprised (just like I was) by his exceptional capability of predicting the future market moment.

Thank you Vik, for sharing your knowledge and ideas and helping us to become better at trading!

Vik has put together a great course...

Vik has put together a great course which distils his study and experience of trading the markets using an easy to understand, highly enjoyable and methodical approach. The course runs over a period of a few weeks with sessions dedicated to each step needed to learn how to trade successfully. He has also put together a very comprehensive support group with a huge number of resources available through discord and various other channels. I wholeheartedly recommend this course if you wish to put into practice a professional approach to your trading.

★★★★★ Jan 28, 2021

An excellent training program!

At the beginning of the course, I had minimal knowledge of technical analysis in trading. Vik started with trading psychology, followed by fundamentals of the market and the structure, and ultimately taking me to the advanced concept. Every lesson becomes the foundation for the next one. At the end of the course, I felt very enlighted and confident about technical analysis.

Vik is a great researcher and practitioner, an excellent teacher, and has a thorough understanding of market psychology. He takes time to explain without being concerned about time.

A massive thank you, Vik.

Reviews & Testimonials

Rajat Patel, UAE

I am a skilled stocks trader and I have been trading in stocks since paper trading (before internet) days. But when I switched to currency markets, I found myself going wrong in majority of trades due to their more of technical nature.
For more than 3 years, I have been following Vikinsa's YouTube channel and I have seen the majority of his trading journey and results. I always found his technical analysis accurate and useful in his videos.

So, I decided to learn this black magic! from Vikinsa's Online course for "Fibonacci Core Strategy Program (FCP)". After finishing online live training with Vik I have surpassed all of my own expectations.
Most important is the way he teaches Fibonacci & Price action with very easy rules. Once I started applying my learning on the live market, I was amazed to see the results. As if I am commanding the market to touch the price and then go to the target where I wanted. You should follow his work regularly to see the results for yourself.

Over this entire time period that I have been watching his work and known him, I have understood that he is the Zen Master of Fibonacci and very humble servant to the markets. I will highly recommend him.

Best Fibonacci course you would ever find...
Thanks Vikinsa for all the wonderful and insightful sessions. It was definitely good knowledge for me to gain and now I have a very different perspective to look at market. There are so many jargons for technical analysis and ***Vikinsa's distilled version and strategy*** *of training program is* ***impressive****! He is* ***passionate about teaching*** *and you can see in his course delivery and builds up concepts gradually to make sure you understand; combined with assignments makes you thorough.*

As a trader you might think market may go up or down but with Vikinsa's Fibonacci core training, you not only can tell where it's heading but you can also quantify until what level; which ***provides precision and accuracy****. This is only possible through Fibonacci level and Fibonacci confluence strategy training. So if you wanted to use technical analysis but wanted a purified version of tools, approach then* ***Vikinsa Fibonacci training is a must****!*

Review of FCP (Fibonacci Confluence Patterns) course by Vikinsa

Before Vikinsa, I was lost in a sea of trading advice. After years of learning from various mentors and books, my analysis was barely better than flipping a coin. Fibonacci seemed like a mystical tool, not a practical strategy. But then I found Vikinsa.

Having followed Vikinsa for over two years, I was consistently impressed by the accuracy of his analyses. Enrolling in his FCP group classes was a game-changer for me as a trader. Vik's teachings unveiled the true potential of Fibonacci as a confluence tool, not just a decorative overlay.

Vik's course significantly accelerated my learning curve, and his distinctive teaching style distinguishes him from other mentors. His firsthand experience translates into a well-developed trading methodology, a strategic approach, and a vital positive mindset.

Vik's commendable expertise in technical analysis makes complex concepts enjoyable and accessible Beyond his teaching prowess, Vik is an exceptional mentor. He patiently ensures that students grasp the basics, goes beyond allocated session timings, provides detailed feedback on assignments, and addresses numerous questions. Vik Sir is truly a wealth of knowledge, and I am grateful for the invaluable insights gained through his mentorship.

Vik is a master trader and a great mentor

Vik is a master trader and a great mentor

He has a no non-sense approach to trading and he will hold your hand and guide you towards your destination

He will teach you how to unlearn all the wrong things injected in your mind and infuse you with power trading strategies

He will introduce you to a very unique course content. It covers various ways to accurately use fibonacci and identify W&M patters. It does not stop there and gives you deep insights on how to measure profit targets and avoid stop loss hunting.

If you wish to learn from someone who is honest, knowledgeable and dedicated Then vik is your man..

I highly recommend services of Vik to anyone who is really serious to learn

FCP course highly recommended

I have been trading over 9 years, but never made any money. After completing my course, I feel really transformed. The way I am looking charts now, I never looked that before. Vik is a very profession teacher and he shares the knowledge with passion. FCP (Fibonacci Confluence Pattern) course is very well defined and by the end of course you will learn lots of new things which you might not have tried before. This course is highly recommended.

Amar Patel, United Kingom

I have been a professional trader for many years and have recently wanted to apply skills towards currencies. I realised these markets were quite technical, but my technical analysis skills weren't up to scratch and found Vikinsa's course online. I decided to give this a go, after spending some time in their telegram channel and understanding the emphasis Vik put in learning the concepts than just providing signals.

I must say, the course surpassed all my expectations. Vik teaches TA from the ground up and provides a deep understanding of price action and fibonnacci, with clear rules to follow. I now find myself applying these concepts on all markets and it has revolutionized the way I approach trading. Vik is also very much available at all times and gives complete dedication towards the student, ensuring they grasp concepts rather than memorising them. The key is putting this together into a complete trading plan and risk management system, and this is also provided too. I cannot recommend the course highly enough – the fee is undervalued as you will make money from this!

FCP One-To-One training

FCP trading training is a must, it changes everything you think you know about trading, one on one class with Vik teaches discipline, psychological approach to trading, and how to be in control of your emotions and much more.
I have a different approach to the market after taking this class with Vik.
Vik is a good teacher who is patient and compassionate about what he does so he makes you put in the work, it won't come easy, you will really put in the work.

Date of experience: 02 January 2023

- **Structure:**
  - New batches start based on availability of instructor's time and schedule.
  - Course length is 9 classes spread over 1 month or so. Each class will be 1 to 1.5 hours long. There will be around 2 to 3 classes per week via web conferencing based on time availability and progress. Please see Tuition Structure & Fee slide for more details.
  - Full groups will be minimum of 3 traders. Groups are not always available. They are limited to availability and request.
  - **Classes may or may not be video recorded so attendance is mandatory. Students must take notes during the classes.**
  - Class time schedule will be communicated in advance will only be slightly flexible.
  - Due to limited availability, it will not be easy to upgrade from one tuition plan to another once the tuition has started. Please request and wait for availability.
  - **Post course completion QA sessions may or may not be one-to-one.** They can be in groups too to allow to learn from other traders' experiences and questions too.
- **Fee:**
  - Entire tuition fee is payable before the start of the course with at least 2 days before the first class. No instalment options are available.
  - There are no refunds of any sort available once the course class has commenced. Instructor reserves the right to cancel the tuition of a student who is in the violation of point listed on "What To Expect From The Student".
  - **Students bear the cost of transaction, VAT and any other applicable fee such as bank transfer fee and foreign exchange fee.**

What To Expect From The Instructor

- Be and stay professional. We all will work as fellow friendly professional traders. Strictly uphold the rules of engagement to high friendly yet professional standards.
- Give the best possible efforts to make student(s) comfortable in the knowledge.
- Stay consistent in classes and fulfil commitments towards students.
- Give each student a fair chance to learn and grow.
- Not share student personal details with any third party and maintain privacy.
- Plan and provide class times in advance and commit to them. In case a class is not conducted, the instructor will re-plan a class as per student's availability.

Nihaar Pradhan, Kent (United Kingdom)

Vikinsa's Core Strategy Training Program – is a must!

Lalesh W., London (United Kingdom)

"Yesterday's class was fantastic. Suddenly, EUR USD chart is **making so much sense**. And I am able to corelate multiple MW patterns at different time scales."

-Lalesh W.
(Feedback after a live class session.)

What To Expect From The Student

- Have prior familiarity of financial markets either stocks or forex. This course is not for absolute beginners although if interested, we can arrange for free pre course instructions to brings student to up to speed.
- Have at least some experience in looking at charts and using a trading platform such as MT4, Ninja Trader or TradingView.
- Have minimum required knowledge of candle sticks. (Knowledge of candlestick patterns is beneficial but not necessary)
- Have an open mind to learn and follow what is being taught rather than trying to implement what you know.
- Not to share the taught knowledge and information with outside world. All information is copyrighted. Your further access and future help can and will be terminated immediately. Violations to the copyright will have legal consequences.
- In the absence of login activity, your access to your account and content including class recordings can be blocked.
- Students chat rooms are available for life time but only if you make use of them and contribute to them. It is community driven area. In the absence of activity your access will either be blocked or terminated. You must also not share contents of these rooms out side and for commercial gains. Violations will lead to permanent bans from all access.
- Stay professional. We all will work as fellow friendly professional traders. No disrespect and no personal remarks on any sort towards the instructor and fellow traders.
- Be consistent in classes and complete the assignments in time for a feedback.
- Respect class time restrictions and act to maximise the benefit of allotted time. If student misses a planned class, it will not be re-planned. A planned class cannot be cancelled unless a 24 hours advance notice is given to the instructor. Cancellation/postponement are only allowed few times and are reserved for unusual circumstances only.
- Must take notes on paper, ask questions and practice as guided.
- No expectation of being master or expert in trading. Like all skills, trading also takes time to become and art from skills.
- Don't expect a signal or analysis service. Classes and QA sessions are for teaching only.
- Provide basic information such as real name, city & country, telegram & discord ids, Gmail id to access trading resources. Your data and class material can be reused by vikinsa.
- Topics, curriculum contents and timings may change anytime to maximise learning and time management. Stick to the process for good results.
- **These terms and conditions can be updated at any point in time without any notice. The latest terms and conditions will be applicable to all engagements.**

Vikinsa Capital Management

Our Terms of Engagements

- We will tell you want you must hear not what you would love to hear.
- We are not going to make you rich, the best analyst or the best trader.
- We are not providing any kind of advice. We are not qualified financial advisors. This engagement is for education only. You need to make your own decisions outside or inside markets.
- We will not be able to advice you on trades. We can only present our opinions only if you ask us.
- We are not going to answer any personal questions including those related to our personal trading. We will follow the same.
- You understand that we are providing a limited time service. We will not be present all the time for you. Please see Engagement Duration of your tuition plan.
- Our education materials, presentations and meetings are for you only. You paid for them. We expect you to respect that at least for yourself.
- You are welcome to leave the course in the middle or to continue with it.
  (Fee is not refundable as per brochure under any circumstances.)
